

Hopkinsville Kentuckian.

VOL XIX.

HOPKINSVILLE, KENTUCKY, FRIDAY, JANUARY 15, 1897.

NO. 5.

Inventory Sale

An invoice always brings to light odds and ends and sometimes full lines of seasonable good that a merchant prefers to sell at cost and even at less than cost rather than carry them over.

We have just finished our January invoice and it has brought out an unusually large lot of odds and ends that we are very anxious to close out and if prices will do it will be done.

Haven't room to itemize, but you can count on finding tremendous bargains in every department in our store.

J. H. ANDERSON & CO.,
Boots, Shoes, Clothing and Men's Furnishings.

Our Invoice is Finished

and as we went through our store we picked out all

Broken Lots.

We are going to place them on the table at

RICH BARGAIN PRICES
For the NEXT 30 DAYS.

You will find what you need in

Boots, Shoes,
Underwear and Hats.
at Low Prices
on our Bargain Counts.

PETREE & CO.

Sign of the Big Boot.

ARE YOU INTERESTED IN HARNESS OR SADDLERY?

CREAM OF NEWS.

IF IT IS NEW AND TRUE THIS COLUMN HAS IT.

Garrison Makes a New Bond—Ed Dabney Recaptured—Many Assessments Raised—Etc.

Slight O. V. Wreck.

The local freight on the Ohio Valley railroad was wrecked near Fredericksburg. An oil tank car got across the track and the oil had to be pumped out before the wreck could be cleared. All trains were delayed several hours. No one was hurt.

Railroad Man's Mishap.

Princeton, Ind., Jan. 11.—James L. Berry, a well-known switchman on the Louisville, Evansville & St. Louis railroad, had a leg crushed by a car running over it to night. Mr. Berry is master of the Brotherhood of Trainmen of this city. Amputation of the limb will follow the injury.

Anderson Negro Not Tried.

Dave Powell, Will Dixon and Will Loving, the three negroes who attempted to kill Louis Metzner at Henderson, are still in jail here and will not be taken to Anderson for trial until the result of Metzner's wounds is finally determined. They have been indicted for malicious shooting.

Another Lynching in Order.

Chas. Taylor, col., cuticed a girl 14 years old from her home near Frankfort and after repeated assaults, murdered her and buried her naked body face downwards in a hole in the ground. He has been jailed and the negroes threaten to lynch him under the Governor's nose. A special guard is protecting the jail.

The Board of Equalization.

The County Board of Equalization adjourned yesterday after raising about 400 lists and lowering some. It is impossible to tell the amount of the changes, as no calculation has been made. The Board will reassemble Jan. 26 to hear complaints from those whose assessments have been raised.

Bryant Brothers Bring In.

Bob and Lawrence Bryant, colored, (brothers), who got into a row at Graceland last Christmas day and fired five shots apiece at each other, were arrested near Montgomery Tuesday by Constable Brane and lodged in jail here about 8 o'clock the same night. The date of their examining trial has not been set and it is likely that the matter will be before the grand jury. Bob Bryant, one of the prisoners, who received a bullet in his arm, has about recovered.

Ed Dabney Captured.

Ed Dabney, the negro who escaped from jail here some time in October last, was arrested by Constable Brane Wednesday, near Peay Dee, and returned to prison. Dabney was last seen here playing a pool and gaming, and while Turkey Kinney-Taylor, col., was feeding the prisoners Dabney managed to pass out and escaped into the darkness and had since been at large. He entered a plea of guilty yesterday in both cases and was sent to the work house for 75 days.

The Murray Poisoning.

Last Thursday night Mr. Milton Booker, who lives two or three miles south-east of town, was awakened by one of his children who was very sick and in convulsions. Mr. Booker gave the alarm and when some neighbors came they discovered that another child was already dead. Mr. Booker and the remaining child were so sick he finally recovered. The symptoms were as from poison and can only be accounted for from something they ate for supper. Canned fruit was first suggested, but the doctors think possibly the poison was in the soft drink—probably tyrolean, containing from impure vessels in which the milk had been kept.

Clyton Garrett Surrenders Again.

Clifton W. Garrett came in yesterday from Bolivar and surrendered to County Judge Breathitt.

He had not yet had an examining trial on his original charge, but learning that a new warrant charging him with homicide had been issued, he came in and waived examination. The trial set for next Monday will of course not be held.

He at once gave two new bonds: One of \$500 for killing Tom Leavell, col., and one for \$1,800 for wounding Rouben Leavell.

The following bondsmen signed both: J. J. Garrett, Tom Garrett, Walton Garrett, P. C. Sallee, C. C. Carter, Douglas Bell, Jno. C. Garrison and Jas. H. Bradshaw. The bond is worth at least \$150,000. The case now goes over until the February grand jury investigates the facts.

JUDICIAL DISTRICT POLITICS.

Messrs. Harding, Garrison, Molloy and Wash, the four Democratic county chairmen constituting the district committee of the fourth judicial district, will meet at Eddyville next Monday for the purpose of calling a convention or primary election to nominate candidates for judge and commonwealth's attorney.

This meeting will be one of much importance to the Democratic party and no mistake should be made by the committee.

It is not permitted to suggest what ought to be done, our opinion is that a convention should be held early in the spring and that the Populists and other bimetallists be invited to co-operate with the Democratic party in electing men who will represent the principles of the majority in this important district. We say that a convention should be held, because it is less expensive, is less liable to be objected to by those who are expected to co-operate with us in a fair method of securing the will of the majority, and it affords a better plan for avoiding mistakes and getting a strong and popular ticket. We believe the proposed plan, based on the previous one, will be adopted, the convention will have all the advantage of a direct expression from the people at their voting places. We would further suggest that this convention meet in Murray, in order that the delegates may have opportunity to become acquainted with the relatively situated county and exchange views and greetings with the voters of the county having the largest number of silver men outside the Democratic party. If such a plan is adopted, and a convention called to meet at Murray, not later than the middle of January, all supporters of Bryan will be allowed to participate in the primary meeting, we believe the Committee's action will receive the approval of the united opposition to Republicanism in this district.

As to the personnel of the ticket, that is a matter of easy and satisfactory solution. We believe that all qualified men, who stand with both feet upon the Chicago platform, and who have the confidence of the people, can make a winning race. But there must be no stodging, no temporizing, no double-dealing. No goldbug need apply, for the party must mean something, something definite. We believe the question that has brought about the present condition of the country. The candidates must be men able and willing to meet the Republican candidates upon the stump and force them to defend their unorthodox principles.

There will be candidates in perhaps each of the four counties meeting these requirements and at least one of the nominees will be all means come from Calloway county. If the people of that county can present a good man with the solid endorsement of his county, he will be nominated. Let us hear from Calloway.

Ed Dabney Captured.

Ed Dabney, the negro who escaped from jail here some time in October last, was arrested by Constable Brane Wednesday, near Peay Dee, and returned to prison. Dabney was last seen here playing a pool and gaming, and while Turkey Kinney-Taylor, col., was feeding the prisoners Dabney managed to pass out and escaped into the darkness and had since been at large. The nomination of W. M. Fanning to postmaster at Memphis was confirmed Tuesday.

SPLIT HER HEAD.

REUBEN SERGEANT ATTACKS HIS WIFE WITH AN AXE.

Escapes From The Work House and Attempts Murder—Still At Large—His Victim Not Dead.

Reuben Sergeant made a desperate attempt Wednesday morning to kill his wife.

Tuesday he was sent to the work house on the testimony of his wife for drawing a pistol and threatening her life. He was put in for 36 days.

Wednesday morning he escaped by climbing the fence and went straight to his house in the third ward, across the railroad from the Ellin Ice Factory. He picked up an axe in the yard and rushed into the room and before his wife could escape struck her in the head and the weapon grazed the skull and cut off part of one ear. The blow knocked her down and thinking he had killed the woman Sergeant threw down the axe and made his escape.

He is still at large. Detective W. T. Braine started out yesterday to look for him. Sergeant came from Paducah and it is probable he went in that direction. He is a bad man to be at large and ought to be sent to Eddyville. His wife was not fatally hurt and will recover, but she will be disfigured for life.

PERSONAL GOSPI.

Miss Myrtle Lindsay, of Madisonville, is visiting Mrs. Chas. M. Meacham.

Mr. J. L. Tobin attended the Tobacco wedding in Nashville, Tenn., yesterday.

Miss Jennie Winfree, of Hopkinsville, is visiting at Col. R. Rowland's on North Seventh.—Paducah Register.

Dr. A. E. Bentley was summoned to the bedside of his sister, Mrs. W. E. Bourland, at Dixon, Tuesday. She was reported dangerously ill.

Mr. Clem C. Plance, formerly with Troy Steam Laundry, Dayton, Ohio, has accepted a position as foreman of starch department in the Hopkinsville Steam Laundry.

Dr. B. W. Stone, of the Morning-side Retreat, Nashville, Tenn., was in the city Wednesday for the first time in several months. The Doctor is the picture of health and is pleased with Nashville as a place of residence and business.

Mr. Wm. N. Beeby, the rising young lawyer, has just returned from an important and successful business trip to Santa Fe, New Mexico. He went to look after the interests of some Clarksville clients in a big will case. He placed the matter in the hands of local attorneys and accompanied his purpose by visiting Mr. Neely bids fair to make a pronounced success of his chosen profession.

Mr. J. C. Terry has moved his family from Adairville to this city and has located on South Campbell street. The Adairville correspondent of the Russellville Ledger, pays the following high compliment to Mr. Terry: "Mr. Terry has been a resident of Adairville for nearly sixteen years, and many of his friends here who regret very much to give him up. He has ever been ready with a helping hand for every good cause that was calculated to build up Adairville. As a merchant he has all the time been in the front rank, and has accommodated many who could not have found a more comfortable abode elsewhere. Mr. Terry and family will be greatly missed in business, church and social circles, and Adairville's loss will be Hopkinsville's gain."

In Rip Van Winkle.

Chas. F. Underhill will appear at the Tabernacle to-night in an impersonation of Rip Van Winkle. The audience is inexpressibly charmed by Mr. Underhill's rendering of "Rip Van Winkle," and at its conclusion have very much the same feeling that always comes on witnessing the play. "Rip" seems to have been there with all his fun-loving characteristics. Gretchen, with her constant fault-finding, and she had cause enough, never won him back. Nicely and indeed almost as distinctly as though Mr. Underhill had the assistance of many. But he is alone. The illusion created is the effect of his masterly genius as an impersonator. His dialect is perfect, his voice and manner admirably suited to every situation, and the story is spoken and acted in a way that leaves nothing to be desired.

Those who intend going out to hear him will be glad to know that arrangements have been made to light the house with clusters of incandescent lights and also foot-lights for stage. Tickets are selling rapidly at Elgin's. Admission 35c. Children 20c.

Nailers at Ironton, O., are declining to submit to a cut of 20 per cent. in their wages.

NO ADVANTAGE.

Though Her Husband Was a News-paper Man She Met Failure.

The debating club was in trouble. It had run across a problem that it could not solve.

But suddenly there was a rift in the clouds. The president had a bright idea, and they were scarce enough at that particular time to be highly prized.

"I move," she said, "that the question be referred to the treasurer to report upon at the next meeting."

"But why the treasurer?" asked several in unison.

The president seemed surprised at the question.

"Her husband is a newspaper man," she asserted, as if that settled the matter.

"But even newspaper men don't know everything," protested the treasurer, being roused to action by the certainty that everything was going against her. "I admit that there is a popular impression in some quarters that they do, or at least that they ought to, but it is erroneous."

"Of course not," admitted the president. "No one ever accused newspaper men of knowing everything, but some of them have facilities for finding out, and only last week you told me that your husband had charge of the query department, and answered questions that would make a statistician's hair turn gray."

"Y-e-s, but—"

"No buts about it," insisted the president. "All you have to do is to ask him about what you want to know. Everybody else appeals to me, so why shouldn't you? It must be a great satisfaction to have an 'Answers to Correspondents' man in the house."

"I used to think so, but—"

"Well?"

"Well, I saved up one or two nice questions for him because I thought it would flatter him, but I guess he's past the flattering stage, for all he did was to growl out over his paper: 'Write it out clearly and concisely, using only one side of the sheet, and then mail it to the editor, and it will be answered in the paper in due course of time.' Oh, it's getting to be a regular habit with him, and that's all I can get out of him on the subject. Why, I asked him what he wanted for dinner the other day and he told me to write out my questions clearly and concisely on one side of the sheet and mail it to the editor. I guess you'd better give the problem to some one whose husband isn't in the business of answering questions."—St. Louis Republic.

A JUDGE OF ENGLISH.

Made a Difference Who Was on the Bench.

JAMES LANE ALLEN, of the Chicago bar, is one of the most polished of men. A public reader, an author of charming sketches, a lover of books, he has color of titles to position in the ranks of the literati. One time he was arguing a case before Judge Gary, previous to the jurist's elevation to the appellate bench, and came to a point which turned on the construction of a sentence. Mr. Allen satisfied his reading of the sentence at first sight, and was amazed when Judge Gary held against him. The sturdiest of men, he said: "But, if the court please," and paused, puzzled for a fitting statement. Then his temper got the better of him, and he went on: "If the court please, it may be the court knows more law than I do, but I really think I am the better judge of English language." "That may be," said Judge Gary, mildly; "but I do not see what bearing it has on this case. I am on the bench and you are not."

And the court's English stood.—Chicago Post.

What to Do with Mistakes.

Mistakes are not to be worried over when they are once made. Mistakes already committed are to be recognized, so as to their repetition avoided; but lamentation over them is worse than useless, it only makes matters worse by crippling energy for future success. Roberton says: "He is not the best general who makes the fewest false steps. He is the best who wins the most splendid victories by the treblets of mistakes." The practical question in view of a manifest mistake is not: "How could I have done that?" but, "What can I now do to correct that mistake, or to make it tell to advantage?"—S. S. Times.

Our Quarter Dollar.

For those who believe in the fatality of the number 13, the American quarter-dollar is about the most unlucky article they can carry on their persons. On the said coin there are 13 stars; 13 letters in the scroll which the eagle holds in its claws; 13 feathers composing its wings; 13 feathers in its tail; there are 13 parallel lines on the shield, 13 horizontal stripes; 13 arrow heads, and 13 letters in the words "quarter dollar."

PRINCE AND JUDGE.

The Dispensation of Primitive Justice by Montenegro's Ruler.

The name by which Prince Nicolas of Montenegro is familiarly known to his people signifies, if we are not mistaken, judge, a title which the prince likewise owns. In his person indeed, he represents the court of appeal, and from his sentence there is no further recourse. Once or twice a week he holds this court, seated beneath a tree in the open air. On certain occasions, when the weather is fine, in front of his palace. In former times, as Signor Yriarte tells us in his history of Montenegro, and on grand occasions, this tree must have witnessed scenes of epic character, which illustrated well the warlike nature of these people.

In 1861 the prince (the being then 20 years of age) looked on unmoved at the struggle maintained by the Herzegovinians against Turkey.

Signs of mourning for Danilo I were still out in the town when messengers brought the news that the enemy had advanced on Montenegro.

Nicolas ordered the royal standard to be unfurled on the palaces, arms, ammunition and horses to be in readiness, and messengers to be dispatched in every direction.

That same evening, at sunset, the prince seated himself under the tree, and all the inhabitants of Cettigne stood around him, while he proclaimed the state of war, and intoned the "Pesma," a collection of warlike songs and patriotic hymns destined to rouse the courage of the least bellicose.

In the present day, when he holds his court of justice, the humblest as well as the first among his citizens may approach him, no other intermediary exists between him and his subjects. He corresponds and converses directly with the highest and the lowest of them. No need for anyone to employ a lawyer to settle a dispute; when two parties are not agreed on any legal point they refer the case at once to the prince, and whatever sentence he pronounces is accepted without a murmur. From 30 to 40 persons, having grievances to be settled, assemble every evening in the neighborhood of the palace, smoking their pipes and waiting patiently for the prince to arrive. If he should not show himself, the conductor and brakeman came to their assistance. Under instructions the latter threw the remains of the trunk out of the car door from fear that it might contain some other explosives. The train men were afraid to make an examination of the contents of the loaded trunk, but as it went out of the breech, entered his brain and killed him instantly. Lambert had just repaired the gun and had failed to fit it together properly.

A farmer named Lambert accidentally shot and killed himself in a peculiar manner near Florence, Ala. He was hunting and when he fired his gun the charge came out of the breech, entered his brain and killed him instantly. Lambert had just repaired the gun and had failed to fit it together properly.

FASHION A CENTURY AGO.

Dresses Worn in St. James' Palace

in 1797.

A newspaper of June 6, 1797, contains a description of the dresses worn at the drawing room at St. James' palace on the king's birthday. It is interesting to know what was really the fashion 100 years ago. The king wore a plain brown coat and light blue satin waistcoat, embroidered with silver. Her majesty was attired in a rich silver-spangled net drapery over a blue satin petticoat, with five diamond diamonds, festoons, wreaths of blue satin leaves in perpendicular stripes, with three beautiful diamond buttons in each chain. The pocket holes were ornamented with silver-spangled net, tied in large bows with silver cord; and two very large diamond roses in blue satin leaves; body and train of white and silver tissue, ornamented with a rich border of silver-spangled net over blue satin and silver fringe. Her majesty, as usual on her royal consort's birthday, wore a profusion of diamonds on her head, and had on her superb diamond stomacher and belt. The princess of Wales was decorated with a very beautiful net embroidered petticoat of white and silver, with diamond diamonds, and with diamond buttons in each chain. The pocket holes were ornamented with silver-spangled net, tied in large bows with silver cord; and two very large diamond roses in blue satin leaves; body and train of white and silver tissue, ornamented with a rich border of silver-spangled net over blue satin and silver fringe. Her majesty, as usual on her royal consort's birthday, wore a profusion of diamonds on her head, and had on her superb diamond stomacher and belt.

—FRIDAY, JAN. 15, 1897.—

It is positively announced that Sherman will be in the McKinley cabinet as Secretary of State.

"Me Too" Platt will succeed Hill in the Senate from New York, with organized opposition. The caucus last night.

A young man named Foreman who called on a daughter of Mrs. Webster of Cate, of Ohio county, met with a warm reception. She threw hot water on him.

Mrs. Mary E. Hobart is a candidate for United States Senator from the State of Washington, and has opened headquarters at the capital.

The two silver parties in Hopkins county are getting together for this year and will agree upon a fusion ticket. The Populists want the judge, jailer, assessor and representative.

The Princess de Chaimay, an American divorcee, has been engaged to appear in a tableau vivant at Berlin at \$750 a night. Chinay draw well, or she may not. It will depend to some extent on her costume.

The Democratic Committee of Hopkins county will meet Jan. 23 to fix a time for the county convention. The Hustler publishes a list of 45 candidates and says the list is by no means complete.

The fusion question has been reopened in McCracken county and chances are that the Democrats and Populists will yet pull together for county offices. Conference committees now have the matter in hand.

All of the new Governors elected last fall have now assumed office. Gov. Adams, Democrat, of Colorado, was inaugurated at an expense of less than five dollars to the state. He walked to the state house and quiet took his oath of office.

John Wanamaker's attempt to buy a seat in the Senate was even a worse failure than Addicks made in Delaware. He was beaten by a young man named Penrose only 36 years old, who was sharp enough to swing on to Boss Quay's coat tail.

Lawyer Jas. H. Colemen, of Murray, has stopped all talk of his probable candidacy for Commonwealth's Attorney, by announcing himself a candidate for County Attorney of Calloway. Conn Linn, a son of Judge Linn, is running for the same office.

The Calloway Times throws some additional light on the reported R.-Populist-Populist negotiations:

"In connection with the story of a combine between Breathitt and Keys in the judicial race in the Murray district, which was published in yesterday's Register and virtually confirmed by Mr. H. C. Miller, it is little to be surprised that the Palmer House comes another that indicates that the scheme does not go altogether as smoothly as the plotters would like—in fact it is lacking in one very essential detail. In the first place Butler Keys is not to be found. In consequence, the statement that he was, is constituting out of a misapprehension. Furthermore, it was stated last night by a well-posted gentleman from that section, the plan is not endorsed by Judge Keys, who, it was stated by this gentleman, does not want to be Commonwealth's Attorney, and does not especially care to be connected with him. The judge would not be adverse to going on the bench however, though, he is not an active aspirant for that honor. This being true, Judge Keys' little plan to succeed himself is blocked."

The same gentleman is authority for the statement that "Uncle Ben" Keys is quite sure on the Republicans for the "throw down" they gave him last fall. He confidently expected to get enough Republican votes to elect him to congress, and while he did not succeed in doing so, however, the Republicans failed to deliver the goods probably because young Thomas had a head of his own and would not be "used."

These stories come so straight that it looks like the Register must be on the anxious watch now and are merely quoting the stiff-necked Populist leaders of Calloway—in other words the tables are turned."

Mrs. Thomas Drim was burned to a crisp at Camp Nelson.

Kentucky's electoral vote was cast and certified to at Frankfort Monday, 12 votes for McKinley and Hobart and one for Bryan and Sewall. Wedding and Howes, the hindmost Republican electors, were tied and Howes was chosen elector and Howes made messenger to take the vote to Washington.

Another of Louisville's largest mercantile houses is closing out to quit business.

Marietta in Clarksville.

Bennettsboro, Jan. 11.—Mr. E. B. Smith, a well known young farmer of this neighborhood, and Miss Mary E. Newton a popular young lady of Trigg county, went over to Clarksville this morning and were married at the Noxington House at 2 o'clock.

Rev. Mr. W. C. Clark of Clarksville, who accompanied them, performed the ceremony. The happy couple returned this evening and will be tendered a brilliant reception at Mr. A. R. Smith's, father of the groom.

Miss Lloyd Lewis of Benton, Ky., is mysteriously missing. She left her husband and was last heard of at Paducah, December 18. It is feared she has committed suicide.

William Miller was killed at Foxport, Ky., by the upsetting of a wagon loaded with heavy timbers.

United States Senator Perkins was re-elected by the California Legislature.

A Great Opportunity to Secure a Business Education at Home.

Prof. M. G. Everett representing Draughan's Practical business College, Nashville, Tenn., and Texarkana, Tex., is now in Hopkinsville, where he will teach a short course of bookkeeping and short hand. Prof. Everett writes in letter him letters showing that he is traveling strictly in the interest of the colleges, which are reliable institutions.

These colleges offer through their representatives some exceptional inducements to all who take a special course and find themselves not meeting the great opportunity. Enter soon in order to get advantage of the full term. See Prof. Everett, headquarters over Cox & Boulware.

Dissemination Notice.

Following the dissolution of the firm of Garrett & Moore, I have to announce that Stephen E. Trice, Jr., is associated in the office with me under the firm name and style of A. W. Garrett & Co. We will continue the General Insurance Business at the old stand, corner of Eighth and Main Streets, Hopkinsville, Ky., representing the following leading American and foreign companies, to wit: Royal Insurance Company, of New York; First Insurance Company of New York; Fire Association of Philadelphia, Pa.; United Firemen's Insurance Company, of Philadelphia, Pa.; Metropolitan Plate Glass Insurance Company; Travelers of Hartford (Accident Department); National Fire Protection Association, and Special Agent of the New York Life Insurance Company.

Thanking the public for past favors and respectfully soliciting a continuation of the same,

WALTER F. GARNETT.

A final settlement of the accounts of Bamberger Bloom & Co. has been made and the assignee was discharged yesterday. The settlement was at the rate of \$1000 a day. The company hopes to resume business, but has no definite plans in that direction.—Tuesday's Courier Journal.

From this it will be seen that Louisville business circles are trying the experiment of "fifty cent dollars," in spite of the postponement of free coinage.

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dredged disease which has been able to cure in all its stages, and that is Catarrh. His Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is an internal action directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease and giving the patient strength by building up the constitution and assuring a long life of health. The proprietors have such faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address, F. J. Cheney & Co., Toledo, O. Sold by Druggist, 75c. Hall's Family Pills are the best.

OUR Annual Clearance Sale

FOR 15 DAYS

BEGINS MONDAY JAN. 18.

PREPARE TO BE PLEASED.

It's a blessing to be within reach of such an opportunity. We make prices which you cannot resist.

In absolute bargains it eclipses them all. Our Annual Inventory brought out the fact that in many lines we are too heavy stocked at this season of the year. We have determined to reduce them in order to make room for our Spring Stock. We have not permitted greed for profit to deter us in the least. We have made up our minds to let them go, Profit or no profit, Cost or no Cost.

Ready with Our Bargains.

Above us stands no competing stock, below us lie no competing prices; we will commence with bargains, we will continue with bargains.

FIFTEEN DAYS of Bargains Unequalled in History!

Dress Goods!

Dress Goods!

Our invoice has devolved many remnants which we have placed on our bargain counter. We want to sell them in making the prices, cost cuts no figure, they MUST GO.

All of our Novelty Wool Dress Patterns at 1-3 off.

Pause and think what this means:
\$12.00 Suit for \$8.00
10.00 " " 6.66
7.50 " " 5.06
5.00 " " 3.33

These prices should be an inducement for you to buy for future, if you don't need them for present use. With almost a certainty of a higher tariff they cannot be as low as now.

Yours Very Truly,

Richards & Comp'ny.

HOPKINSVILLE, KY.

LONGEVITY.

Some Remarkable Cases That Have Been Placed on Record.

Among the examples of modern longevity in the United States, of San Salvador, is conspicuous. He was, according to the Lancet, 180 years old in 1878, and, if he is still to the five, is likely to complete his second century. He believed that he had lived so long because he had never eaten more than one meal a day. Even in that he limited himself to what he could tuck in during the short space of half an hour. He therefore was a living argument against those hygienists who bid us eat slowly and masticate well. His diet was chiefly vegetable, meat, which was always well-cooked before entering into it only twice a week. For two days in every month he fasted, and he drank large quantities of water. His plan included several other details and, on the whole, we of the three-score and ten can, without envy, wish him joy.

Macklin, the comedian, who lived and died in Covent Garden, was a wonderful oddity, in virtue of which—or perhaps in spite of which—he managed to get through 107 years. He followed the wise and simple rule of eating when hungry, drinking when thirsty, and sleeping when sleepy. All these he did on a liberal scale. He never took off his clothes except for the purpose of having his body rubbed all over with brandy. He always slept in blankets, and history does not record a single journey on their part to the laundress. And his couch, which was hard, was placed in the middle of the room.

What is most strange about longevity is that it comes, like the dew of morning, to all classes. Kings who live in luxury, beggars who through existence in a state of chronic cold and hunger, giants and pygmies, abstainers and drunkards, large eaters and small eaters, tollers and sluggards, brain-workers and body-workers, vegetarians and carnivores, smokers and non-smokers, sane and insane—all have apparently an equal chance of the prize of long life. An old woman who died in Ireland at the age of 112 was all her life a beggar, and during the last half of it was never known to eat or sleep better than the poorest of the poor to the other. In the United States, on the other hand, a man even exceeded this figure, and he was never known to pass a day without eating as much as himself, as an ordinary family of five. It was also an American who grew a new and fine set of teeth at the age of 106 for the purpose of eating three pounds of pork, three pounds of bread and a vast quantity of cabbage on the day when he gave up the ghost. On the other hand, a Shoreditch barber, who died aged 105, never drank anything but water and ate only once a day. A priest of New York lived solely on vegetables, which kept his machine running and in perfect order for 106 years.

Among a host of others, one gentleman of 127 years, a grandson of the famous Thomas Parry, attributes his length of days to extreme temperance and regular exercise. And Mrs. Judith Bannister, who died at Coves in her 108th year, lived on apples, biscuit and milk and water for the last 69 years of her life; while a man named Confit, of Burythorpe, achieved the wonderful span of a century and a half through moderate eating, great exercise and gulping down a raw egg once a day. By a pleasant process one Earl of Huntingdon consented to eat only 100 birthdays. He too lived to eat oysters at every meal. Roasted turnip for supper every night in the year formed the elixir that carried Mr. Wilson, of Sussex, through 116 years. And Mr. Elkins, of Combe, lived a century by feeling, during the latter two-fifths of it, on bread, milk and turnip tops. Mrs. McCarthy, of Cork, breakfasted at seven, dined at one and supped at half-past six. This she declared was the secret of her long life. She died aged 93 years. Mr. Philip Larouge, a Canadian butcher, who died last week at 90 years of age, had lived to be 102, while a Keeney man named McCarthy drank rum and whisky as we take tea and coffee. If he was ever tempted to descend to claret or ale, he drank, immediately afterwards, an equal quantity of poteen, "as a wedge," he said. He kept doing this for 111 years. Smoking heavily was the practice that kept Mrs. Robertson, a Scotch woman, going for 106 years. And Mr. Richard Brown, of Peterchurch, was never seen without a pipe in his mouth. It would be interesting to hear some Transvaal records for in that country they keep the pipe going with as much constancy as a blast furnace.—London Standard.

Ancient Wooden Building.

The oldest wooden building in the world is said to be the church at Borgund, in Norway. It was built in the eleventh century, and has been protected by frequent coatings of pitch. It is built of pine and in fantastic Romanesque design.

THIS AND THAT.

—Vienna has a strange "Silence club," composed of married men, who meet, dine and spend the evening together without talking.

—F. T. Palgrave, who compiled the "Golden Treasury of English Lyrics," has prepared a book reciting the true story of landscapes in poetry from Homer's time to the present day.

—A London gas company is about to petition parliament to change the qualifications for the directorship in order to enable a workman to become a member of the board of directors.

—Kaiser Wilhelm is having a large building erected near his palace at Mon Bijou, for exercise in winter. It will contain a gymnasium, tennis and racquet courts, fencing rooms and a covered bicycle track.

—Sarastava, the violinist, has a red Stradivarius, for which he says he has just refused an offer of \$30,000 made by an American collector, after rejecting bids by the same man of \$1,000, \$3,000 and \$5,000.

—Between 40 and 50 women, mostly Americans, have registered at the University of Berlin this semester. At Zurich, where there are 150 of them, the women students are demanding equal rights with men.

—Adelina Patti is studying at Craig-y-Nos a new opera called "Pandora," by M. Andre Polonais, the young composer who wrote for a year ago the pantomime drama, "Misha." She intends to bring out the opera at Nice next spring.

—Sardou's new play is called "Spiritisme," and brings in spiritualism seriously, as the dramatist has for some time professed to be a believer in it. The play is constructed for Sarah Bernhardt, who will produce it after appearing in Alfred de Musset's "Lorenzaccio."

—There are now 560 miles of electric roads in Europe, an increase of 125 miles during the year. The number of cars has increased from 1,200 to 1,747. Germany has 350 with 250 track and 837 cars than France, Great Britain with 65 miles and 168 cars and Austro-Hungary with 45 miles and 157 cars. Russia has one line with six miles of track and 32 motor cars. Of the 111 European lines 91 are worked by the overhead trolley system; three, each in Germany, England and Hungary, by an underground current; nine by an insulated central rail, and eight by storage batteries.

GRUESOME BUSINESS.

Razor Strops of Human Skin Are Now on the Market.

It is well known that in dissecting the most delicate and finest of steel instruments are used. It is necessary to keep these instruments extremely sharp. The ordinary coarse stone or strop would utterly destroy the delicate blades. It is well known that a razor can be nicely "finished" on the palm of the hand. This fact led to the use of small crude strops made of bits of flesh, secured in the dissecting-room. The possibilities of such a strop which was especially so forcible to the medical mind of one of the students that he began experiments which have resulted in the introduction very quietly on the market of a razor strop made of human flesh.

One side of these strops is made of black flesh and the other side of white flesh. The skin for these strops is secured in this way: When students are given parts of the human body to dissect the skin is usually removed and thrown away. This waste skin is now in great demand.

Conventionalism on the subject is extinct, no one deplores the suddenness of the event, and those who speak frankly say openly: "How terrible for the archbishop's relations, but how fortunate for him." The instinctive wincing or shivering of the mind seems, in fact, to have been transferred to the death after the first blow.

The leg skin is the part most prized, as it is from this that the most desirable strips of flesh for razor strops are secured. The epidermis and the dermis are carefully removed together in a strip 18 inches by 5 inches. All fat is cut away and the strip is then put in a strong solution of arsenic and water, where it is allowed to remain for about five hours.

It is now changed to a weaker solution of arsenic and left for a day and a half. It is thoroughly saturated with linseed oil so that it, after being rubbed the wrong way, smooth, round stick it is rendered flexible and ready for mounting.

The two strips of human flesh are pasted together back to back, and make a razor strop which is said by those who have used them to be far superior to the ordinary razor strop of leather.—San Francisco Chronicle.

Coal Supplied Through Pipes.

Mr. Andrews claims that coal can be piped to any desired point as easily as oil, and very economically.

He has demonstrated, by an experimental line in New York, that the coal can be crushed at a slight

height and sent later through the mains.

He says that the cost of delivering to mills and other consumers will be much less than at present. One objection, however, might be the difficulty of burning this wet coal dust.

YEOMEN AND WARDERS.

Ancient Corps Which Are Frequently Confounded With Each Other.

Two English semi-military organizations, which exist, as do many other institutions in the United Kingdom, largely on account of tradition, rather than from any special necessity, are the tower warders and yeomen of the guard. From a hazy idea of their actual duties and a similarity in their uniform they are often confounded.

—F. T. Palgrave, who compiled the "Golden Treasury of English Lyrics," has prepared a book reciting the true story of landscapes in poetry from Homer's time to the present day.

—A London gas company is about to petition parliament to change the qualifications for the directorship in order to enable a workman to become a member of the board of directors.

—Kaiser Wilhelm is having a

large building erected near his palace at Mon Bijou, for exercise in winter. It will contain a gymnasium, tennis and racquet courts, fencing rooms and a covered bicycle track.

—Sarastava, the violinist, has a

red Stradivarius, for which he says he has just refused an offer of \$30,000 made by an American collector, after rejecting bids by the same man of \$1,000, \$3,000 and \$5,000.

—Between 40 and 50 women, mostly Americans, have registered at the University of Berlin this semester. At Zurich, where there are 150 of them, the women students are demanding equal rights with men.

—Adelina Patti is studying at Craig-y-Nos a new opera called "Pandora," by M. Andre Polonais, the young composer who wrote for a year ago the pantomime drama, "Misha." She intends to bring out the opera at Nice next spring.

—Sardou's new play is called "Spiritisme," and brings in spiritualism seriously, as the dramatist has for some time professed to be a believer in it. The play is constructed for Sarah Bernhardt, who will produce it after appearing in Alfred de Musset's "Lorenzaccio."

—There are now 560 miles of electric roads in Europe, an increase of 125 miles during the year. The number of cars has increased from 1,200 to 1,747. Of the 111 European lines 91 are worked by the overhead trolley system; three, each in Germany, England and Hungary, by an underground current; nine by an insulated central rail, and eight by storage batteries.

—Razor strops of human skin are now on the market.

—We wonder whether any statistician or any doctor in great practice knows accurately whether there is any positive increase among the educated classes in the number of sudden deaths, by which we mean deaths without any recovery of consciousness from the moment of occurrence. We fancy it is so, though the fancy may only be born of the special notice one accords to such events; and we fancy also that such a marked change in the manner in which such incidents are regarded. Forty years ago everybody who heard of sudden death of his acquaintance like that of the archbishop of Canterbury deemed it incumbent on him to profess, and in many cases actually felt, a sort of horror which to-day is almost absent from men's minds.

Conventionalism on the subject is extinct, no one deplores the suddenness of the event, and those who speak frankly say openly: "How terrible for the archbishop's relations, but how fortunate for him."

The instinctive wincing or shivering of the mind seems, in fact, to have been transferred to the death after the first blow.

The leg skin is the part most prized, as it is from this that the most desirable strips of flesh for razor strops are secured. —Razor strops of human skin are now on the market.

—We wonder whether any statistician or any doctor in great practice

CURIOS OF THE CENSUS.

Singular Occupations Followed by Some Men and Women.

Occupations open to the thirty individuals of both sexes have grown increased during the last two decades, or even since the taking of the last decimal census in 1890. The extraordinary progress of science during the time specified and the application of its principle to the practical problems of human life have not only had the effect of greatly increasing the capacity for production in the trades already firmly established, says the St. Louis Republic, but have opened broad fields of opportunity.

There are, of course, dozens of these new and remarkable occupations with which science does not deal even in the remotest sense. In this class we find the rat catcher, the skunk farmer, the man who makes his living by picking up lost things in depots, theaters, hotels, etc., and returning them to their owners with the expectation of being rewarded; the clock winder, the man who collects naps and lesson plans, and the Lake Michigan mosquito state, which is now engaged in raising black cats for their fur. They are not raising these cats on water, as might be inferred from the title, but have leased an island in the great lake, which is now plentifully stocked with both sexes of the scrapping felines.

There are still others in the non-scientific category of queer occupations, but it will only be necessary to mention a few. One is a "rat-tatting farmer," who lives in the Ozark mountains and makes the prairie dogs his chief money-making

crop. Many of them are decorated for distinguished service in the field. Arthur Rule was a decoration for distinguished conduct at Inkerman, and Robert Kirk carries the only Victoria cross in the corps, for saving the colors at

the town. The town warders are also usually issued from among the non-commissioned officers of the army, but it is not necessary that they should have seen war service. They are eligible until they are 50 years of age. Their uniform is the same as that worn by the yeomen with the exception of the cap.

The uniform is provided by the government at the request of the Queen of England, who has been giving money from three different directions.

The oil is disposed of to druggists, who have regular customers that believe it to be a panacea for a hundred different ills; the skin he sells to would-be cowboys, who use them as handbands, and the skeletons are always a ready sale, the purchasers being the curators of the natural history departments of the different college and society museums. The man who wakes people in the morning, the old cork collector and the dog catchers are well-known characters in every large city.

The individuals who gain a livelihood by selling pictures that are artistic are equally as numerous as those who follow the more humble callings. In the list of occupations that are strictly scientific is the manufacture of artificial eggs, artificial coffee and false diamonds. Also the industry of making buttons, combs, penholders and other articles of a similar nature, from bone, blood collected at the slaughterhouses. The man who makes billiard balls, buttons and rings from potatoes which have been treated to a solution of nitric and sulphuric acids is also the proprietor of "industry" wherein the fundamental principles are strictly scientific.

But the greatest of all is carried on by two young Pennsylvanians, who are making a regular business of extracting the poison from honey bees. According to the accounts they have two different ways of collecting their crop of venom. In the first the bees are caught and held with their abdomens in small glass tubes until the poison sacks have been emptied. In the second they are placed in a bottle on wire netting and enraged until the drops of venom fall into the alcohol bottle which fills the lower third of the bottle. This venom is said to be a sovereign remedy for cancer, rheumatism, snake bite and a hundred others of the more terrible ills of humanity.

—An Odd Experiment.

A scientific investigator recently placed several dogs in separate kennels and chose for each animal a separate occupation, such as walking on the hind legs, barking at command, etc. The dogs spent most of their waking time at "lessons." Then they were killed, when it was found that in the dog which had been trained to bark, that portion of the brain which controls the organs of speech had enlarged more than the rest; in the dog trained to walk, the portion controlling the muscles of the legs predominated; in every case that portion of the brain was found to be most developed through the agency of which the special act required of the dog had been performed.

—An Odd Experiment.

It has been held that consumption is hereditary, as it is the fact that one person of a family had died with consumption was considered a sure sign that others of that family could not escape. This is partly true and partly untrue, as the consumption lungs is likely to transmit that weakness to his children. But there is no reason in the world why the weakness should be allowed to develop. Keep the lungs full of rich, red, wholesome blood, and the weakness will disappear. Doing this, and a new material will be added until the lungs are well and perfectly strong again. This is the thing that Dr. Pierce's Golden Medical Discovery does. This is what makes it cure 98 per cent. of all cases of consumption where it is taken according to directions. It is paradoxical to declare that it cures gout when it may be in the body and forces them out of the system. It supplies the blood with rich, life-giving properties. It makes the appetite good, digestion perfect. Send 21 cents in one-cent stamps to World's Dispensary Medical Association, Buffalo, N. Y., and receive Dr. Pierce's 1008 page "Common Sense Medical Adviser," profusely illustrated.

It is said that peach yellow is transmitted by budding.

A sound Liver Makes a W. Man.

Are you bilious, constipated or troubled with jaundice, sick headache, bad taste in mouth, foul breath, coated tongue, dyspepsia, indigestion, hot dry skin, pain in back and between the shoulders, chills and fever, etc. If you have any of these symptoms, your liver is probably poisoned, because your blood does not act properly. Herbine will cure any disorder of the liver, stomach or bowels. It has no equal as a liver medicine. Price 75 cents. Free trial bottle at R. C. Hardwick's drug store.

Peppermint is produced in New York and Michigan.

Another Good Man Gone Wrong.

He failed to use Foley's Kidney Cure for his kidney complaint—For Sale in C. K. Wyly.

Russia exports more wheat than any other country.

S. F. Price, of 677 Sedgewick street, Chicago, says "I had a severe cough which settled on my lungs. I tried a number of advertised remedies and also placed myself under treatment of several physicians, with no benefit. I was recommended to try Foley's Honey and Tar. With little expectation of getting relief, I purchased a bottle and took two drams at a time. When I felt greatly improved, I enabled to sleep, spitting of blood ceased, and by the time I had taken the second bottle I was entirely well. It saved my life." For sale by C. K. Wyly.

An attempted train wreck was discovered near Tampa, Fla.

Not a few who read what Mr. Robert Rows, of Hollands, Va., has to say below, will remember their own experience under like circumstances:—"Last winter and last spring I left home in a low state of health. I tried numerous remedies, none of which did me any good, until I was induced to try a bottle of Chamberlain's cough remedy. The first bottle of it so far relieved me that I was enabled to attend to my work, and the second bottle effected a cure." For sale at 25 and 50 cents per bottle by R. C. Hardwick, druggist.

Gov. Wheeler lectured at Chatanooga to a packed house.

Catarrh is a constitutional disease and requires a constitutional remedy like Hood's Sarsaparilla, which purifies the blood.

The Loud postal bill passed the house.

The sugar-coating, makes Ayer's Pills easy to take, it dissolves immediately on reaching the stomach, and so permits the full strength and benefit of the medicine to be promptly communicated. Ask your druggist for Ayer's almanac, just out.

Gov. David M. Clough, of Minnesota was inaugurated.

The folly of prejudice is frequently shown by people who prefer to suffer for many years rather than try an advertised remedy. The millions who have no such notions, take Ayer's Sarsaparilla for blood-diseases, and are cured. So much for common sense.

Vice Consul Springer talks of affairs in Cuba.

Wonderful South American Blood Cure. Quickly dissipates all serpulous taints in the system, cures pimples, blotches and sores on the face, thoroughly cleanses the blood of boils, carbuncles, abscesses and eruptions, renders the skin clear, young and beautiful. If you would escape blood poison with all its train of horrors, do not fail to take this wonderfully bitter, which has performed such stupendous cures in all cases of shattered constitution and depravity of the blood. Bad health signifies bad blood. Sold by R. C. Hardwick, druggist, Hopkinsville, Ky.

The Three Friends may be held for piracy.

SAVED BY HIS HORSE
Faithfulness and Intelligence of One Animal in Battle.

A graphic story is told by Surgeon-Capt. Grey, one of the officers who served in Rhodesia. In the attack on Mashambombe's the horses began to drop, and soon 13 lay on the ground, and it looked as if the men would all be killed. Evidently Capt. Turner thought so, for he virtually gave the order: "Save your pout," telling every man to fight the best he could for his own hand. But though the horses continued to fall, the men escaped. Dr. Grey, to use his own words, "led towards the way out" under a raking fire at a gallop, and was closely followed by the trooper.

"Very soon, however, I fell from the saddle, struck with a bullet from a elephant gun about 500 yards off. The bullet struck straight on the top of the thigh, smashing the socket of the thigh-bone, breaking a vein, and otherwise wounding me. My horse was carried on at full speed with the rear-guard, which rushed at desperate speed to clear the pocket-like entrance of the drift, where the natives were rallying in the hope of killing us. As I lay on the grass, bleeding profusely, I looked up and saw two natives aiming at me at a distance of about 40 feet. At the same moment I saw my horse come thundering back from the drift. It suddenly stopped and came and stood over me prostrate body, covering me from the front, at the same time making a noise like a noise through its nostrils. I thought it was to wound and that with the pain noise and confusion it had gone mad. This creature, however, was soon dislodged, for it continued to stand over me in a kneeling posture, and I could see that the faithful animal had come back to protect me.

"I may remark here that this horse, which I myself selected, I made a pet of. The assegais from the approaching natives were now beginning to fly around me, and thinking if I could reach my horse's back I should be shot, which was preferable to being assegaied. I seized the reins, put my right foot in the stirrup, and made a supreme effort to mount. And I did not know for my left side was entirely wasted. In finding myself in the saddle, I called: 'Go, to my horse, which darted like an arrow from the drift.'—St. James Gazette.

INTERESTING MOSAIC.

An Ancient Tablet Representing Virgil Writing the Aeneid.

After Italy and Provence there is no country where Rome has left more monuments in every state of preservation and decay than in Tuns. The largest Roman circus after the Coliseum is El Djem, Arles ranking next, and Nimes third. At a recent sitting of the Academy of Inscriptions in Paris, M. Boissier gave an account of a remarkable Roman discovery at Susa, in Tunis. The French, who, unlike the English in Egypt, have settled down in Tunis for good, have got a camp at that seaport which is "a mine of mosaics," where fresh discoveries are made every year. The other day a party of soldiers digging foundations unearthed a mosaic with three human figures in a perfect state of preservation, covered with only a few inches of soil. It is only three and one-half feet square, but the subject is Virgil writing the Aeneid. Very interesting, all. There is a faint view of the poet loosely draped in the folds of a white robe with a blue fringe, sitting with his feet in sandals resting on a step. He holds on his knees a papyrus roll on which is written in cursive letters one of the verses of his poem.

Muss, milti causa memnon: quia nuncum luteo
Quidque deinceps regna Deum, etc.

With his right hand on his breast, the forefinger pointing upwards, his head erect in an inspired attitude, he listens to Clio and Melpomene, who, standing behind, dictate his cantos.—London News.

Chaperones for Hire.

One of the most extraordinary results of the present cycling craze is the formation in London of a "Charrone Cyclists' Association," which provides companions for those who do not think it proper to ride alone and who cannot conveniently find others to accompany them. The terms are 3s. 6d. for an hour, or 10s. 6d. by the day, and the chaperones follow the cyclists, providing a escort for the race and women. The active principles of government are specific neurotics of the face and womb. Cures can be obtained by the use of the "Dynamite" bath. The Doctor has been over the world and has never been taken up by other physicians. Vendome Building.

St. Louis is the largest tobacco manufacturing center.

St. Louis: Pies.

SYMPTOMS—Mastitis; intense itching and burning of the skin, with discharge of a thick, watery fluid, which often bleeds and ulcerates, becoming very sore and painful. The skin becomes discolored, loses elasticity, and in most cases becomes gangrenous. Ulcers heal slowly, leaving a hard, crusty, necrotic surface.

Caustic ointment.

HERE AND THERE

-WANTED.—Salesmen to sell lubricating oils, greases and specialties. Liberal offer to proper party, Jewel Refining Co., Cleveland, O.

—Dr. E. N. Fruitt, Dentist, office over City Bank, Hopkinsville, Ky.

The residence of Mr. John Sergeant, of Pembroke, was burglarized Sunday night and a number of articles of value were carried off.

—The Tandy place, corner Clay and 16th street, six room cottage, is for rent for \$97. Apply at this office.

E. B. Ledford's business house at Pembroke was entered by thieves a few nights ago and the cash drawer relieved of several dollars in small change.

—I want to sell or rent my two store rooms and lot who would exchange for a residence.

Geo. W. CENTER.

Sheriff Mc J. Davis has purchased the Wash Harry farm, on the Cox Mill road, about three miles from the city, the consideration being \$6,000. Mr. Harry has bought a residence in this city and will move in next week.

—The late Dr. J. P. Thomas' double strength digester, known as VITALIA, for the cure of "Jesepsis," is for sale at Hardwick's and Engles.

Mrs. Blanche E. Smith, who has recently taken charge of the department of physical culture at Bell Female College, will give a recital Monday evening, Jan. 15th, in the college chapel. She will be assisted by Misses Follansby and Harrison, who will render piano selections, and Miss Green, who will play the violin, which she knows so well how to manage. Friends of the College cordially invited to be present.

—FINE TAILORING.—Have your clothes made, cleaned and repaired by Fowright, the Tailor and Cutter. Recognized by the trade as one of the best up-to-date cutters in the nation. Suits made from \$20 to \$60. Pants from \$5.00 to \$15. Bridge street, opposite New Era office.

The weather clerk made another attempt to send us a snow Tuesday night, but like the other two very light touches of snow which we have had this winter, it did not amount to much. Before daylight the snow turned into drizzling rain and but slight traces of the fall were visible the next morning.

The L. & N. Railroad now requires all tickets to be sold the day they are sold. This important change is now in effect at this division.

In regard to Mr. Chase F. Underhill, who appears at the tabernacle to night, Mr. Wm. H. Morrison, General Secretary of the Y. M. C. A., of Baltimore, Md., says:

"Mr. Chase F. Underhill is one of the standing attractions of our Y. M. C. A. course. He has been with us again in Virginia, and will be on the company this year. He possesses just the ability and faculty to please that insures his constant popularity."

Mr. Jno. W. Ford is one of the most successful breeders of Berkshire hogs in this portion of the State. His stock cannot be surpassed for purity of blood and care in breeding. Mr. Ford has one of the finest herds of hogs to be found in Kentucky. He now has on hand an especially fine lot of pigs ready for the trade at very low prices, quality considered. Those desiring to improve their stock, or to raise pure bred Berkshires, should communicate with Mr. Ford and give him a general order. His postoffice is Church Hill, Kentucky.

Messrs. T. K. Torian and C. A. Chappell, well-known business men of Cadiz, will open a first class grocery in that place next week. They will occupy the old Chappell stand, and the building has been thoroughly overhauled, and properly arranged for the handling of staple establis. Mr. Chappell is a man whom no man stands higher in the commercial world than he, nor has any one more staunch friends. Mr. Chappell is also well known to the trade of that section, having been engaged in the same while residing there for many years. He is a well deserved popular man. The new firm will open with the brightest prospects, and it might well be said that their success is almost a matter to be recorded already.

The work set aside for the services for Friday night, was begun on Monday night. The first service was led by Rev. S. N. Vail, subject, "Spirit of Mission." Tuesday night's service was led by Rev. Mr. Carter, subject, "Success of Missions." Wednesday night, by Dr. Nourse, subject, "Refugee in Heaven." Thursday night, by Dr. Nash, subject, "Prayer as a factor in Missions." To-night, prayer meeting, Dr. Settle presiding. All the services held in the Methodist church.

The will of the late J. B. Radford was left for probate Tuesday. His estate was left to his wife during her life, after which it reverted to his children, his wife and son, Amos J. Radford, is executrix, without bond. The will is dated Aug. 19, 1893.

Mrs. Sue M. Keezer qualified as administrator of the estate of the late John A. Keezer, Wednesday. Messrs. Austin Peay, John P. Bell and C. D. Bell were appointed appraisers.

At Freeing, a hamlet across the mountains in Dickenson county, Va., William Hogston, aged 70, a widower, was married to Mrs. Mary Mullins, aged sixty-seven, after being divorced from her for over twenty years. This was Hogston's fourth marriage. He has twenty-seven living children.

DEATHS

MORRISON.—Mrs. Annie B. Morrison, wife of Mr. Eugene Morrison, Jr., died in Pembroke Wednesday night, Jan. 13, at the home of her father, Mr. R. R. Lowe, who is a retired cobbler from whom she had been a sufferer for two years. Six months ago she grew so much worse that she left her own home and went to her father's, where she could receive a mother's careful nursing. She leaves one child, a little girl three years old.

Mrs. Morrison was 23 years old and was married to Mr. Morrison about four years ago. She was a member of the Baptist church. Her funeral will be preached at 10:30 a. m. to-day at her father's residence in Pembroke, Ky.

PRITCHETT.—Mrs. Cora Pritchett,

wife of Mr. Jno. W. Pritchett, suddenly expired of heart disease Wednesdays morning at an early hour. Before the hour for rising she was attacked by a smothering spell and passed away before assistance could be summoned. She was down in the

THE First Great Sale Of the Year.... BEGINS.. Monday Morning at 9 O'clock Sharp.

A sale of unusual scope and magnitude. Our determination to get and give the most of merit for the money will be visible on every hand.

Bassett & Co.

city the evening before in her usual home. Mrs. Pritchett was one of the best and most charitable of women. She was a member of the Cumberland Presbyterian church, and was a leader in works of charity among the poor. She had during life expressed a wish that her body be kept out of the grave for three days, as she had a horror of being buried alive. In accordance with this expressed desire, the interment will not take place until to-morrow morning at 10 o'clock. The funeral will be preached by Dr. Rev. W. J. King, assisted by Dr. Settle. Interment in Hopewell cemetery.

COLORED

RHODES.—Elvira Rhodes, aged three years, a grand child of Dick McCarty, formerly of this city, died in Chicago Monday of spinal trouble. The remains were shipped here by express Tuesday, and as no one claimed the body it was turned over to E. W. Glass, the undertaker, who buried it Wednesday.

REYNOLDS.—Rebecca, the wife of Charles McReynolds, died near Union school house Tuesday, of exhaustion, aged 30 years.

BRENT.—Mrs. Eliza Brent, mother of A. C. Brent, the Seven street grocer, died of the grip yesterday.

In Olden Times

People overlooked the importance of permanently beneficial effects and were satisfied with transient action; but now that it is generally known that Syrup of Figs will permanently overcome habitual constipation, well-informed people will not buy other laxatives, which act for a time, but finally injure the system.
